

# Job Title: Transportation Development Engineer

**Requisition ID:** 13405

## Company

The City of Vancouver is striving to become the greenest city in the world, and a city powered entirely by renewable energy before 2050. We are proud to be one of BC's Top Employers, Canada's Best Diversity Employers, and one of Canada's Greenest Employers. With employees that have helped Vancouver consistently rank as one of the world's most livable cities, the City values a diverse workforce which represents the vibrant community we so proudly serve.

Consider joining our committed team of staff and being part of an innovative, inclusive and rewarding workplace.

## Main Purpose and Function

Reporting to the Senior Transportation Development Engineer, the successful applicant will be responsible for the technical and strategic evaluation of significant development applications from a transportation perspective. This will include coordination of division-wide review and liaison with other Engineering branches and City departments.

## Specific Duties and Responsibilities

- Represent the Transportation Division with Council and with the public on off-street parking and development related matters
- Write commentaries, prepare terms of reference, and consider and negotiate requirements associated with rezoning and development applications
- Review and comment on technical plans and studies for City acceptance
- Interpret the Parking By-law for developers, architects, consultants, the public and other staff
- Collaborate with an interdisciplinary team and with other City departments, external agencies and community stakeholders
- Assign and check the work of engineering assistants as part of the review of rezoning and development applications
- Participate in the development of new parking policy. This may include review of Parking By-law requirements, travel demand management guidelines/requirements, or development of new policy to support City-wide transportation objectives
- Engage planning and design consultants and project manage their work
- Regularly attend open houses and public hearings outside of normal working hours

## Education and Experience:

- A Bachelor's degree in Engineering, preferably with a focus in Transportation
- Registration or eligibility to register as a Professional Engineer or EIT in British Columbia
- A minimum of 2 years of related transportation engineering work experience

## Knowledge, Skills and Abilities:

- Strong skills in public relations, conflict resolution, team building and presentation
- The ability to work well in a team environment
- Excellent written and verbal communication skills
- The ability to build and maintain excellent working relationships with the public, outside agencies and other employees
- The ability to be proactive in dealing with complaints in a timely and effective manner
- Demonstrated ability to appropriately and thoroughly research and report on technical engineering issues
- Ability to present research results, conclusions and recommendations in graphic and written form
- Ability to direct and supervise the work of engineering/planning assistants and other support staff
- Knowledge of project management best practices is preferred
- Local area travel is a requirement of this position. Transportation arrangements must meet the operational requirements of the Engineering Services Department
- A valid BC Driver's License is preferred

**Business Unit/Department:** Engineering Services

**Affiliation:** Exempt

**Employment Type:** Regular Full Time

**Position Start Date:** June 2019

**Application Close: May 26, 2019**

We thank all applicants for their interest. However, only those selected for an interview will be contacted. Learn more about our commitment to diversity and inclusion.
